

Final event of the 4SECURail project, November 24, 2021 at 09.00 hours

Hit Rail, together with the rest of consortium partners, has the pleasure to cordially invite you to attend the Final Event online conference of the Shift2Rail-funded project 4SECURail. It will take place on November 24th 2021, at 09:00 (ECT).

Started on December 2019, the 4SECURail project is under the scope of the Horizon 2020 topic “S2R-OC-IP2-01-2019 – Demonstrator development for the use of Formal Methods in railway environment and Support to implementation of CSIRT to the railway sector”. The project is part of the Shift2Rail Joint Undertaking Research and Innovation Programme, and the Open Call takes a two-fold perspective by working, on the one hand, on the Demonstrator for the use of Formal Methods (FM), and on the other hand, on the implementation of Computer Security Incident Response Team (CSIRT) for Railways.

The final event conference will be an opportunity to disseminate the results of the project and we hope we will be able to join relevant stakeholders of the European railway sector.

If you are planning to participate in the final event conference, please register through this registration form: <https://site.evenium.net/jefkcdmw/registration>. After the registration process you will receive a link to the Microsoft Teams meeting.

Looking forward to meeting you on November 24th we remain available for any further clarifications at info@hitrail.com
